NCGFM-2018

National Conference on Graphene and Functional Materials

Date: February 23-24, 2018

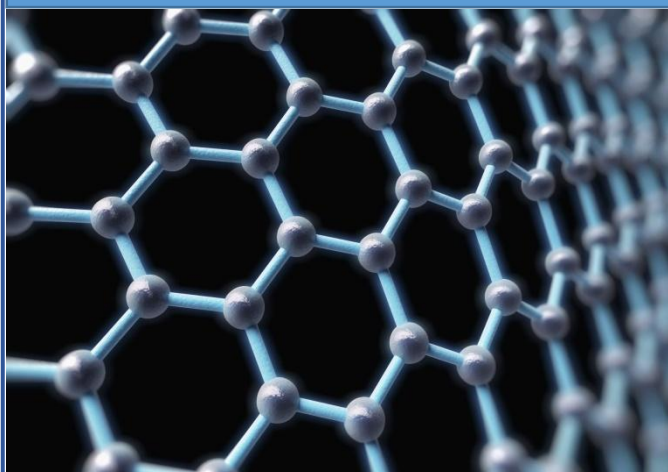

Venue: CSIR-CMERI

Organized by

**CSIR - Central Mechanical
Engineering Research Institute,
M.G. Avenue, Durgapur- 713209
West Bengal, India**

**Theme: Product Innovation and
Technology Development**

About CSIR-CMERI

The CSIR-Central Mechanical Engineering Research Institute (CSIR-CMERI) is established in February 1958 with the specific goals of development of mechanical engineering technology. It is the only national laboratory dedicated to develop mechanical engineering technologies. In India, the number of mechanical engineering technology has accounted for nearly half of the total technology imported. In order to develop indigenously the mechanical engineering related technology for the society R&D can play a key role in self-reliance. As a constituent member under the Council of Scientific & Industrial Research, CMERI – a premier establishment, dedicates to research and development – extends over mechanical and allied engineering fields. . CMERI has started contributing in the area of Functional and Smart Materials. Extensive R&Ds are being carried out on Graphene synthesis, growth and its applications. The Technology of Large scale Graphene production has been transferred to a industry. Some of the significant developments are Graphene based lubricants, Ultracapaitor, Composites, and Coatings.

Objectives

The objectives of this conference is to bring together participants from R&D organizations, academia and industries to exchange and share their research ideas and discuss the future trends and role of Graphene and smart functional materials in societal applications for sustainable developments.

Topics of the Conference

The scope of NCGFM-18 covers a broad range of hot topics on Graphene and functional materials. The authors from R&D organizations, academia and industries are invited to submit research papers (Max 4 pages) on the applications Graphene and functional materials:

- Coatings & Lubrication
- Nano & Micro Manufacturing
- Nano-electronics & Sensors
- Energy Storage Devices
- Composites
- Fuel Cells & Solar Cells
- Water Chemistry
- Computational Material Science
- Catalysis

Best Paper and Poster Awards

- Students are encouraged to participate in poster presentation. There shall be three **best student poster awards**.
- Three **best Paper awards** shall be given for oral presentations.
